## **CITRUS COUNTY FLOOD MANAGEMENT**

**Flood Insurance Mandatory Purchase Requirement** Flood insurance is mandatory for all federal or federally related financial assistance for the acquisition and/or construction of buildings in Special Flood Hazard Areas (SFHAs). An SFHA is defined as any A or V flood zone on a Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM). Property owners can purchase building and contents coverage from any local property and casualty insurance agent. To find a local insurance agent that writes flood insurance in your area visit [www.floodsmart.gov](http://www.floodsmart.gov).

Citrus County provides **flood zone information** based on our community's Flood Insurance Rate Maps (FIRM's). We provide information regarding flood zone designation, Letters of Map Amendments, copies of Elevation Certificates and/or Flood Proofing Certificates, Floodplain Determination Letters, historic flood information, mitigation activities and retrofitting techniques. The BOCC website has a link to the current DFIRM maps which can be accessed and researched by address, alt key etc. via [www.bocc.citrus.fl.us](http://www.bocc.citrus.fl.us) GIS / MAPS. For information contact Karla Grzeca, CFM at [karla.grzeca@bocc.citrus.fl.us](mailto:karla.grzeca@bocc.citrus.fl.us) or 352-527-5310.

## **USING YOUR COUNTY MAP**

1. Locate where you live and work on the map.
2. Determine whether you are in an evacuation area, and if so, what level (color).
3. If you are in an evacuation area, or mobile home/RV, decide where you will go if ordered to evacuate. Your choices include:
  - ✓ Home of a relative or friend outside the evacuation zone
  - ✓ Hotel/motel outside the evacuation zone (make arrangements early)
  - ✓ Go to a public shelter
  - ✓ As a last resort leave the area entirely
4. If you must go to a public shelter, use your county map to decide which one is convenient. Make sure you verify the shelter is open before you go.

## **HURRICANE THREAT**

- ✓ The colored areas on the map are vulnerable to storm surge. Storm surge is produced by water being pushed towards the shore by the force of the winds moving around the storm.
- ✓ Storm surge creates a path of destruction, wiping out structures as it rapidly surges inland and then recedes. This is a life threatening situation for anyone who ignores mandatory evacuation orders and stays in vulnerable areas.
- ✓ Hurricanes are categorized on a scale of 1 to 5, depending on wind strength and destructive power. The evacuation zones are color coded to designate the level of storm surge likely to occur.
- ✓ If you live in an area ordered to evacuate, gather your family/pets and emergency supplies, secure your home and leave immediately. Failure to obey a mandatory evacuation order is a violation of state and local laws.

**Note: All persons living in mobile homes/RVs must evacuate for all mandatory evacuation orders, regardless of where you are located in the county.**
