« Go to Upcoming Event List (/events/event_list.asp)

All attendees will receive an email the morning of the class to start registering by entering your name and email. After this is done, a link to enter the Webinar will be sent to you.

Course Description:

Have you ever wondered about things like freeboard, BFE, elevation certificates and hydrostatic vents? If so, the two day Fundamentals of Floodplain Management class is for you! This class was developed as an introductory course to floodplain management and you can learn about these terms as well as many other elements of floodplain management as you travel down the road to achieving your Certified Floodplain Manager (CFM) certification. While the class is NOT a test-taking course and NOT intended to help you pass the exam (you'll need your own experience for that!) it IS geared towards presenting the information that makes a floodplain manager a CFM and details what they do in their day to day roles. We hope to have multiple instructors share the various topics so you'll hear from numerous individuals who are experienced experts in their specific realms of floodplain management. Sign up now and join us in the world of floodplain management!

Continuing Education:

12 CFM, 12 PE, 12 AICP & 1.2 ICC credits for attending this entire class. No partial credits given. Credit eligibility is based on attention and participation. Multi-tasking during the session may affect eligibility for credit.

Bonus:

After successfully attending the live webinar class, you will receive either the Power Point Presentation and/or the Live Video of the class to review for 6 months. This is only for you and not to share with others.

Class Cost:

Members: \$100, Non-Members: \$300, Student: \$50
